-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grever, US Patent 6,208,740 in view of Chen. Grever discloses a stereophonic magnetic induction sound system comprising an electronic device 14, earphones 12,13, plug 22. The system uses a stereo transmitter without antennas. The receivers are in the earphones. Grever does not disclose small trimmers for variable condensers and coupled resistances for variable resistor in the receiver. Chen discloses a wireless stereo center speaker system comprising a transmitter and receiver. As shown in figure 3 the receiver includes a variable resistor VR1 and a variable capacitor (condenser) VC2. The advantage of using the variable circuit elements was to tune the receiver to the exact transmitting frequency of the transmitter. Thus, it would have been obvious to one of ordinary skill in the art at the time of invention to include the variable resistor and capacitor as taught by Chen in the invention of Grever for the purpose of fine tuning the reception quality of the audio.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boyden et al, US Patent 6,301,367.
